

**VISIT OF MR. AMIT KATARIA, CHRO, MINFY TECHNOLOGIES, OCT. 25, 2023 | INSTITUTE -  
INDUSTRY LINKAGE CELL**

- NSRIT is honored to welcome Amit Kataria, the esteemed Chief Human Resources Officer (CHRO) of Minfy Technologies, as a distinguished guest speaker to our campus. Once again, Mr. Kataria's presentation has left an indelible impact on our students, serving as a beacon of inspiration for those making the pivotal transition from the comfortable confines of campus life to the dynamic and challenging corporate world.
- In his talk, Mr. Kataria emphasized a paramount lesson that transcends the realms of academia and formal qualifications - the significance of competence over the mere accumulation of credentials. His insightful discourse struck a chord with our students as he underlined that true success in the professional arena often hinges on the practical application of skills and knowledge, rather than an impressive list of degrees.
- Furthermore, Mr. Kataria generously shared his personal journey, recounting his own experiences from his college days, illustrating the real-world applicability of his message. Drawing inspiration from the scientific achievements of Marie Curie, specifically her groundbreaking work in radioactivity, he demonstrated that great accomplishments often arise from unrelenting dedication, curiosity, and a willingness to persevere through challenges.
- Above all, his motivational words encouraged our students to cultivate a steadfast commitment to their goals, persistently striving for success, and embodying the spirit of resilience and perseverance. He left them with the profound notion that the pursuit of success is an ongoing journey, and the taste of triumph is all the sweeter when we keep moving forward, regardless of setbacks and obstacles.
- We are truly delighted to have had Mr. Amit Kataria grace our campus with his wisdom and experience today. It is an honor to facilitate this invaluable connection between our esteemed guest and our vibrant student community, which undoubtedly contributes to the holistic growth and inspiration of the next generation of professionals.
